EXPERIENCE

Co-founder, Kalaa SkillTech Mar 2025 – present

- Co-founded a vocational learning startup that gives rural youth technical training and apprenticeships.
- Led frontend development and built the trainee registration and onboarding flow.
- Set up apprenticeship chains with local businesses for job-ready experience.
- Selected under Startup Bihar from more than 10,000 applicants for ₹10 lakh in seed funding.

PROJECTS

Kairo · **TypeScript, Next.js 14, Prisma, PostgreSQL (Neon), NextAuth** Sep 2026

- A task tracker built as a game, where real tasks become quests that pay out XP and gold.
- All reward maths runs on the server, and the completion endpoint takes no request body.
- Quests are claimed atomically, so double completion is impossible even under concurrent requests.
- kairo-olive-beta.vercel.app · github.com/me-adityaraj8/kairo

Rys · **TypeScript, React 18, Node.js 22, Express, PostgreSQL 16** Jul 2026

- A keyboard-first job-search workspace, with a kanban pipeline, resume tracking and AI help.
- Every request passes the same pipeline (auth, demo guard, Zod validation) and every error returns one JSON shape.
- Typed raw SQL instead of an ORM.
- rys-eight.vercel.app · github.com/me-adityaraj8/career-os

QRGen · **TypeScript, React 19, Chrome Manifest V3** Oct 2026

- A Chrome extension that makes QR codes for the page you're on, or for Wi-Fi, contacts and more.
- Makes no network requests at all.
- Styled codes keep their finder patterns solid, and low-contrast colours are blocked so codes still scan.

PROBLEM SOLVING

- 608 problems solved across Codeforces and LeetCode, 39 rated contests, 82-day best streak.
- Codeforces 1398, peak 1407 (Specialist) · LeetCode 1557, top 31.32%.
- 520 GitHub contributions in the last year.
