Education

Indian Institute of Information Technology, Bhagalpur — Bhagalpur, India
Bachelor of Technology in Computer Science and Engineering — *2024 – 2028 (Expected)*

Arihant Public School — Kota, Rajasthan
Class XII; Percentage: 92% — *2023*

Experience

Co-Founder & Tech Lead — Mar 2025 – Present
Kalaa SkillTech — *Bhagalpur, India*

- **Tech Leadership**: Led development of a vocational ed-tech platform for rural youth with a small cross-functional team, owning architecture and technology decisions across the frontend, backend, and database.
- **Full-Stack Platform**: Built the web application with React.js, Tailwind CSS, Node.js/Express, and PostgreSQL, including trainee registration, onboarding, and course-management workflows, which served **100+ trainees**.
- **Auth & Admin**: Implemented authentication and an admin dashboard with role-based access control for centralized management of trainees, courses, and applications.

Projects

Rys – Job Search Workspace — Live | Code
React, TypeScript, Node.js, Express.js, PostgreSQL, Docker

- **Full-Stack Tracker**: Built a six-stage drag-and-drop Kanban job tracker with a keyboard-first, responsive UI.
- **Backend & API**: Designed 20+ REST API endpoints over an 11-table PostgreSQL schema with JWT authentication, bcrypt password hashing, Zod request validation, rate limiting, and forward-only SQL migrations.
- **Job Importer**: Engineered a one-click importer that parses postings from 5 ATS platforms (Greenhouse, Lever, Ashby, SmartRecruiters, Workday) to auto-fill applications, with graceful fallbacks when parsing fails.
- **AI Gateway**: Integrated a provider-agnostic AI gateway (Gemini, Groq, OpenRouter failover) powering ATS keyword analysis, resume-match scoring, and cover-letter drafts.
- **Testing & DevOps**: Wrote Vitest unit tests for auth, analytics, and match scoring; containerized the PostgreSQL, Express, and React stack with Docker Compose, health checks, and multi-stage builds.

Kairo – Gamified Productivity Tracker — Live | Code
Next.js 14, TypeScript, Prisma, PostgreSQL, NextAuth, Tailwind CSS

- **Game Engine**: Built a productivity app that turns real tasks into quests rewarding XP, gold, chests, and companion growth, with streaks, combo multipliers up to ×3, and 20 achievements, all computed server-side.
- **Reward Integrity**: Designed 19 API routes over an 11-table PostgreSQL schema (Prisma); the completion endpoint accepts no request body and claims quests atomically, so rewards cannot be forged or double-counted.
- **Auth & UX**: Implemented NextAuth sign-in (email, Google, GitHub) with JWT sessions and Zod validation, plus keyboard shortcuts, a reduced-motion mode, and 24 Web Audio sound effects.

Technical Skills

Languages: TypeScript, JavaScript, C, C++, SQL, HTML, CSS
Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Tailwind CSS, Prisma, NextAuth, Zod
Databases: PostgreSQL, MySQL, MongoDB
Tools & Platforms: Git, GitHub, Docker, Docker Compose, Vitest, Linux, Postman, Vercel, Railway, VS Code
Concepts: REST API Design, Database Design, JWT Auth, RBAC, Unit Testing, Data Structures & Algorithms
Coursework: Web Technology, DSA, Computer Programming, OOP, DAA, DBMS, Operating Systems, AI

Achievements

- **Seed Funding – Startup Bihar (2025)**: Selected from 1200+ applicants to receive an INR 10 Lakh seed grant for Kalaa SkillTech LLP from the Dept. of Industries, Govt. of Bihar, under the state startup policy.
- **Smart India Hackathon (2026)**: Led a team into the top 15 of 70+ teams in the IIIT Bhagalpur internal round.
- **Competitive Programming**: Solved **600+ problems** across LeetCode and Codeforces and competed in **40+ rated contests**; reached a **1557 LeetCode rating** and a **1407 peak Codeforces rating** (current 1398).
